Subject: Summary of OSRTI activities related to Administrator's directive

Nonresponsive

- Independent Study
 - On Wednesday, August 12, 2015, OSRTI contacted the USACE to begin scoping an independent study/review of the release at the mine in Colorado.
 - As of Thursday, August 13, 2015, the USACE is pulling together their group of experts to brainstorm on key issues to be addressed in the study and to identify key organizations that should be part of the review.
 - OSRTI and other supporting groups are exploring the best ways to pull in key expertise for the study, such as via academia and retirees.
 - On Wednesday, August 12, 2015, OSRTI began exploring contractual support needs and potential vehicles to support the independent study and other related work.

- Postponement of in SEMS 1.7 Release
 - o On Thursday, August 13, 2015, OSRTI decided to postpone the release of SEMS 1.7 due to a request from Region 8 related to the Gold King Mine release. Region 8 requested the delay because it will need to access SEMS over the weekend, primarily for document searches.
 - o The SEMS Reference Desk will send a message to all users shortly to alert them to the change. OSRTI is working with NCC to reschedule this release.
